

# Flexible kit Clipsav™ System

## PERFORMANCES

- This high-performance flexible allows to connect SO2 bottles from MILANE range to different materials of wine cellars (Homogenization tank, preparation tank)
- The flexible is equipped with Clipsav™ system, quick coupling device self sealing with 2 male ends
- The core of flexible is made of PTFE sheathed in a high grade stainless steel braid. This braid is covered with a protective sheath of HDPE.
- The flexible is easy to use thanks to its connections and excellent protection against SO2.
- Quick coupling device self sealing without retention allows disconnections without loss of product protecting users.

## SPECIFICATIONS

Flexible kit contains :

Quantity	Designation	Input type	Output type
1	Clipsav™ Connection	Specific Clipsav™	Female 3/8" Threaded
1	Quick coupling device female	Female Threaded 1/4	Female 1/4 BSPP
2	Quick coupling device male	Female Threaded 1/4	Male 1/4 BSPP
1	1/4 turn valve		

## CHARACTERISTICS

The following features correspond to the flexible:

Designation	Input type	Output type
Lenght	Mm	1800
Diameter	Mm	6
Test pressure	Bar	30

## PACKAGING

There is no restriction for flexible packaging and fittings.

## CONDITIONS OF USE

The steel can be attacked irreversibly by chlorine.
