

Application Field ISO 14001 -Bry

Environmental management system is applicable to development, manufacturing and shipment activities of Bry's site, and products lifecycle steps that can be managed or influenced by Inventec.

This includes :

- Conception and development of « soldering » and « cleaning » products.
- Purchase of materials and packagings.
- Manufacturing of organic parts, solder pastes, solder flux, detergents, solvents, packaging of gaz, maintenance, quality control and wastes management.
- Storage, orders preparation, loading / unloading, shipment.
- Solder pastes , solvents and gaz recycling.
- Site's Internal and external issues and compliance obligations.

Also the external activities below, linked to products lifecycle:

- Deliveries by carriers.
- Use of products by customers.
- Products end of use.

We commit ourselves to deploy and harmonize this environmental management system to all our worldwide manufacturing sites.
