Ecoprogram

Recovery and recycling of polluted fluorinated solvents

The ecoprogram is a service offered by INVENTEC for the **collection and treatment of polluted fluorinated solvents**, in order to respect the environment and to be in accordance with legislations in force (EU 1357/2014), for the following products:

- **Promosolv™** 70, 70ES, 90C, RN2B, 41M, DA1, DE1, DE2, DR1, DR2, DR3, DS1, DS2,
- **All our products resulting from regeneration** (indicated by a T at the end of their name), which can be recycled again,
- **3M™ Novec™** 7100, 8200, 71 IPA, 71 DE, 72 DE, 73 DE, 71 DA, 72 DA.

BENEFITS

- Eliminate the cost of destroying your polluted fluorinated solvents
- Waste management simplify, thanks to our support
- A global offer of fluorinated solvents from their regeneration
- Eco-friendly image to promote your company
- Use of high performance regenerated fluids at the best price
- Integration of a circular economy approach to reduce your ecological impact

4 STAGES

INVENTEC supports you throughout the process. For any other request for products, contact us. This service is also proposed for solvents NOT supplied by us: contact us. ATTENTION: solvents from the Topklean™ range alone are not taken back. Solvents are only taken back in their original packaging, by batch of 2 cans minimum or by drum. The drums must be identified and shrink-wrapped on a pallet. You will be charged for the destruction of any non-recyclable solvent.
