

QUALITY POLICY

Inventec's vocation is:

Invent with our customers and partners a sustainable use of our chemicals in manufacturing processes.

Contribute to their quality, productivity, health and environmental protection.

Optimize and **improve** our productivity and our customer's one.

Inventec is therefore based on 4 main pillars:

PROXIMITY:

Provide ongoing and proximity support, adopting an attitude of listening and dialogue to anticipate changes of technical performance and sustainable development.

RELIABILITY:

Supply to our customers high performance products and services, that are compatible with their processes and equipment.

INSPIRING INNOVATION:

Advise on technological and regulatory developments and help our customers and partners in the development of their processes, with a daily innovation process.

GREENWAY:

Support our customers in controlling and reducing their impact on health and the environment with the:

- Development of a more ecological conception of our products with our **GREENWAY** approach.
- Substitution of hazardous materials before the regulations impose it and the development of risk management solutions for hazardous substances that cannot be substituted.
- A range of recycling solutions - **Ecoprogramme**.
- Following our environmental policy.

François Pacary
Directeur Inventec France

We are also committing to be compliant with legal, customers and other requirements, and to continuously improve our integrated management system.

Our objective

YOUR SATISFACTION
