# Polishing Paste Elimination

**WATCHMAKER, JEWELLERY, GOLDSMITHING,  
MULTIPLE METALS, SMALL & COMPLEX PARTS**

The needs in the application for polishing paste elimination are different from a client to another. The multiple metals, very small & complex parts, composition of the polishing paste (mineral and organic), production throughput, water waste and many other concerns the users today.

**The principal constraints are the attacks of the alloys that make up the parts to be cleaned. How to avoid micropile corrosion in alloys such as brass, monel or mesh, while ensuring optimum cleaning quality ?**

**INVENTEC HAS THE EXPERTISE TO ANSWER ALL THESE PROBLEMS THANKS TO ITS WIDE RANGE OF PRODUCTS :**

- ✓ **AQUEOUS SOLUTIONS**
- ✓ **SOLVENTS**
- ✓ **HYBRID SOLUTIONS**

Inventec will adapt your process by optimizing cleaning quality and process costs.

TYPE OF POLLUTANT	TYPE OF PROCESS	SOLUTIONS
Organic pastes and / or Mineral pastes	ALKALINE AQUEOUS CLEANING BY IMMERSION	<ul style="list-style-type: none"> <li>● Promoclean™ TP 1111</li> <li>● Promoclean™ TP 1112</li> <li>● Promoclean™ TP 1113 (Greenway)</li> <li>● Promoclean™ TP 1114</li> <li>● Promoclean™ TP 1115</li> <li>● Promoclean™ TP 1117</li> </ul>
	HIGH ALKALINE AQUEOUS CLEANING BY IMMERSION	<ul style="list-style-type: none"> <li>● Promoclean™ TP 125</li> <li>● Promoclean™ TP 1128</li> </ul>
	ACIDIC AQUEOUS CLEANING BY IMMERSION	<ul style="list-style-type: none"> <li>● Promoclean™ TP 175</li> <li>● Promoclean™ TP 178</li> <li>● Promoclean™ Dewax+</li> </ul>
	DEWATERING	<ul style="list-style-type: none"> <li>● Topklean™ MC105</li> <li>● Topklean™ MC1110</li> <li>● Topklean™ MC 10</li> </ul>
	CO-SOLVENT CLEANING	<ul style="list-style-type: none"> <li>● Topklean™ MC20A + 3M™ Novec™ 7100</li> </ul>
