

# ECOPROGRAM

service

## SOLVENT REGENERATION

Your used solvent is recycled in specialized equipment to bring it back close to its original specification for re-use in your process.

## SOLVENT RECYCLING

Your used solvent is recycled in specialized equipment to use it as a raw material in our dedicated «made from recycled solvents» product range.

## ECO CONSULTANCY

We advise & offer technical support on

- maximizing solvent bath-life
- minimize consumption
- installing a recycling installation on our customer's site
- waste treatment

## BENEFITS

- ✓ To reduce the amount of waste in the environment
- ✓ To avoid cost & administration for the destruction
- ✓ To buy recycled but still high quality products at lower cost
- ✓ To improve your company's environmental image
